

Re: NAB Petition # 04-160      I am an XM Satellite user & relye on the Weather & Traffic reports as I do alot of traveling on the road. We need this information in the Southern States due to flood reports & the Hurricane warning reports.

We pay for this service & I don't think FCC should try to change something that people rely on while working & traveling the road ways.

The National Association of Broadcaster should not be able to dictate what we want to hear.

I am against anyone trying to dictate to us about our right to Freedom of Speech& Freedom to our Air Ways.
